# WHY WE UPDATE THE TOKENOMICS?

The tokenomics of Savitri Network has been updated as part of the project's natural evolution – not a correction, but a strategic optimization based on real data, market feedback, and long-term sustainability goals.

Over the past year, the blockchain and AI markets have shifted significantly. Liquidity dynamics, investor expectations, and adoption models have matured.

To stay aligned with these new conditions, the Savitri team and advisors conducted an in-depth analysis to enhance balance, accessibility, and transparency across the ecosystem.

Key reasons for the update:

- Market adaptation (2025): align with current Layer-1 standards and investor expectations.
- Accessibility: lower nominal price (\$0.025) enables broader participation and global reach.
- Sustainability: dynamic halving (2y→5y) ensures smoother, long-term inflation control.
- Trust & transparency: multi-signature wallets, time-locked smart contracts, and public wallet registry.
- Adoption readiness: optimized model supports institutional partners and mass adoption.

In short: this evolution makes Savitri more stable, inclusive, and ready for the next phase of growth – without changing its vision or reducing any holder's value.

# EXECUTIVE SUMMARY

Savitri Network evolves its economic model to ensure long-term sustainability, accessibility, and transparency.

The updated Tokenomics v1.3 introduces:

- "Revised to align with 2025 market standards"
- "Dynamic Halving Model (2y→5y)"
- "6% initial circulating supply for stability"

This evolution strengthens the project's foundations – same vision, stronger economics, broader adoption.

# KEY ECONOMIC PARAMETERS

Every change aims to ensure long-term equilibrium, accessibility, and value preservation.

	New Version	Old Version
<b>TOTAL SUPPLY</b>	2,000,000,000 \$SAVI	2,000,000,000 \$SAVI
<b>TGE</b>	2Q 2026	2Q 2026
<b>LISTING PRICE</b>	\$0.025	\$0.25
<b>INITIAL SUPPLY(TGE)</b>	<b>CIRCULATING</b> 153,200,000 \$SAVI ≈ (7,60%)	<b>CIRCULATING</b> 420,000,000 \$SAVI ≈ (14,00%)
<b>PRICE SEED ROUND</b>	\$0,008	\$0,08
<b>STAKING ALLOCATION</b>	45%	52%
<b>LIQUIDITY RESERVE</b>	\$3,000,000 (6% FDV)	\$6,000,000 (6% FDV)
<b>BURN MECHANISM</b>	0.1–1% PER TX +AI/IOT	0.1–1% PER TX
<b>DYNAMIC HALVING</b>	DYNAMIC HALVING (2Y→5Y)	EVERY 5 YEARS

# TRUST & HOLDER PROTECTION

- **“NO LOSS OF VALUE” POLICY.**
- **AUTOMATIC 1:10 REDENOMINATION FOR HOLDERS.**
- **SMART CONTRACT TIME LOCKS.**
- **TRANSPARENT WALLET REGISTRY.**

# HOW \$SAVI IS USED

## \$SAVI COIN UTILITY – POWERING THE SAVITRI ECOSYSTEM

**Transaction Fees** : Fixed ultra-low fee (\$0.0035 per tx) for all on-chain operations.

**Staking Rewards**: Lock \$SAVI to secure the network and earn rewards (8% → 5% → 3%).

**AI Services** : Pay per query (e.g., 0.1 \$SAVI per AI request) for decentralized AI computing.

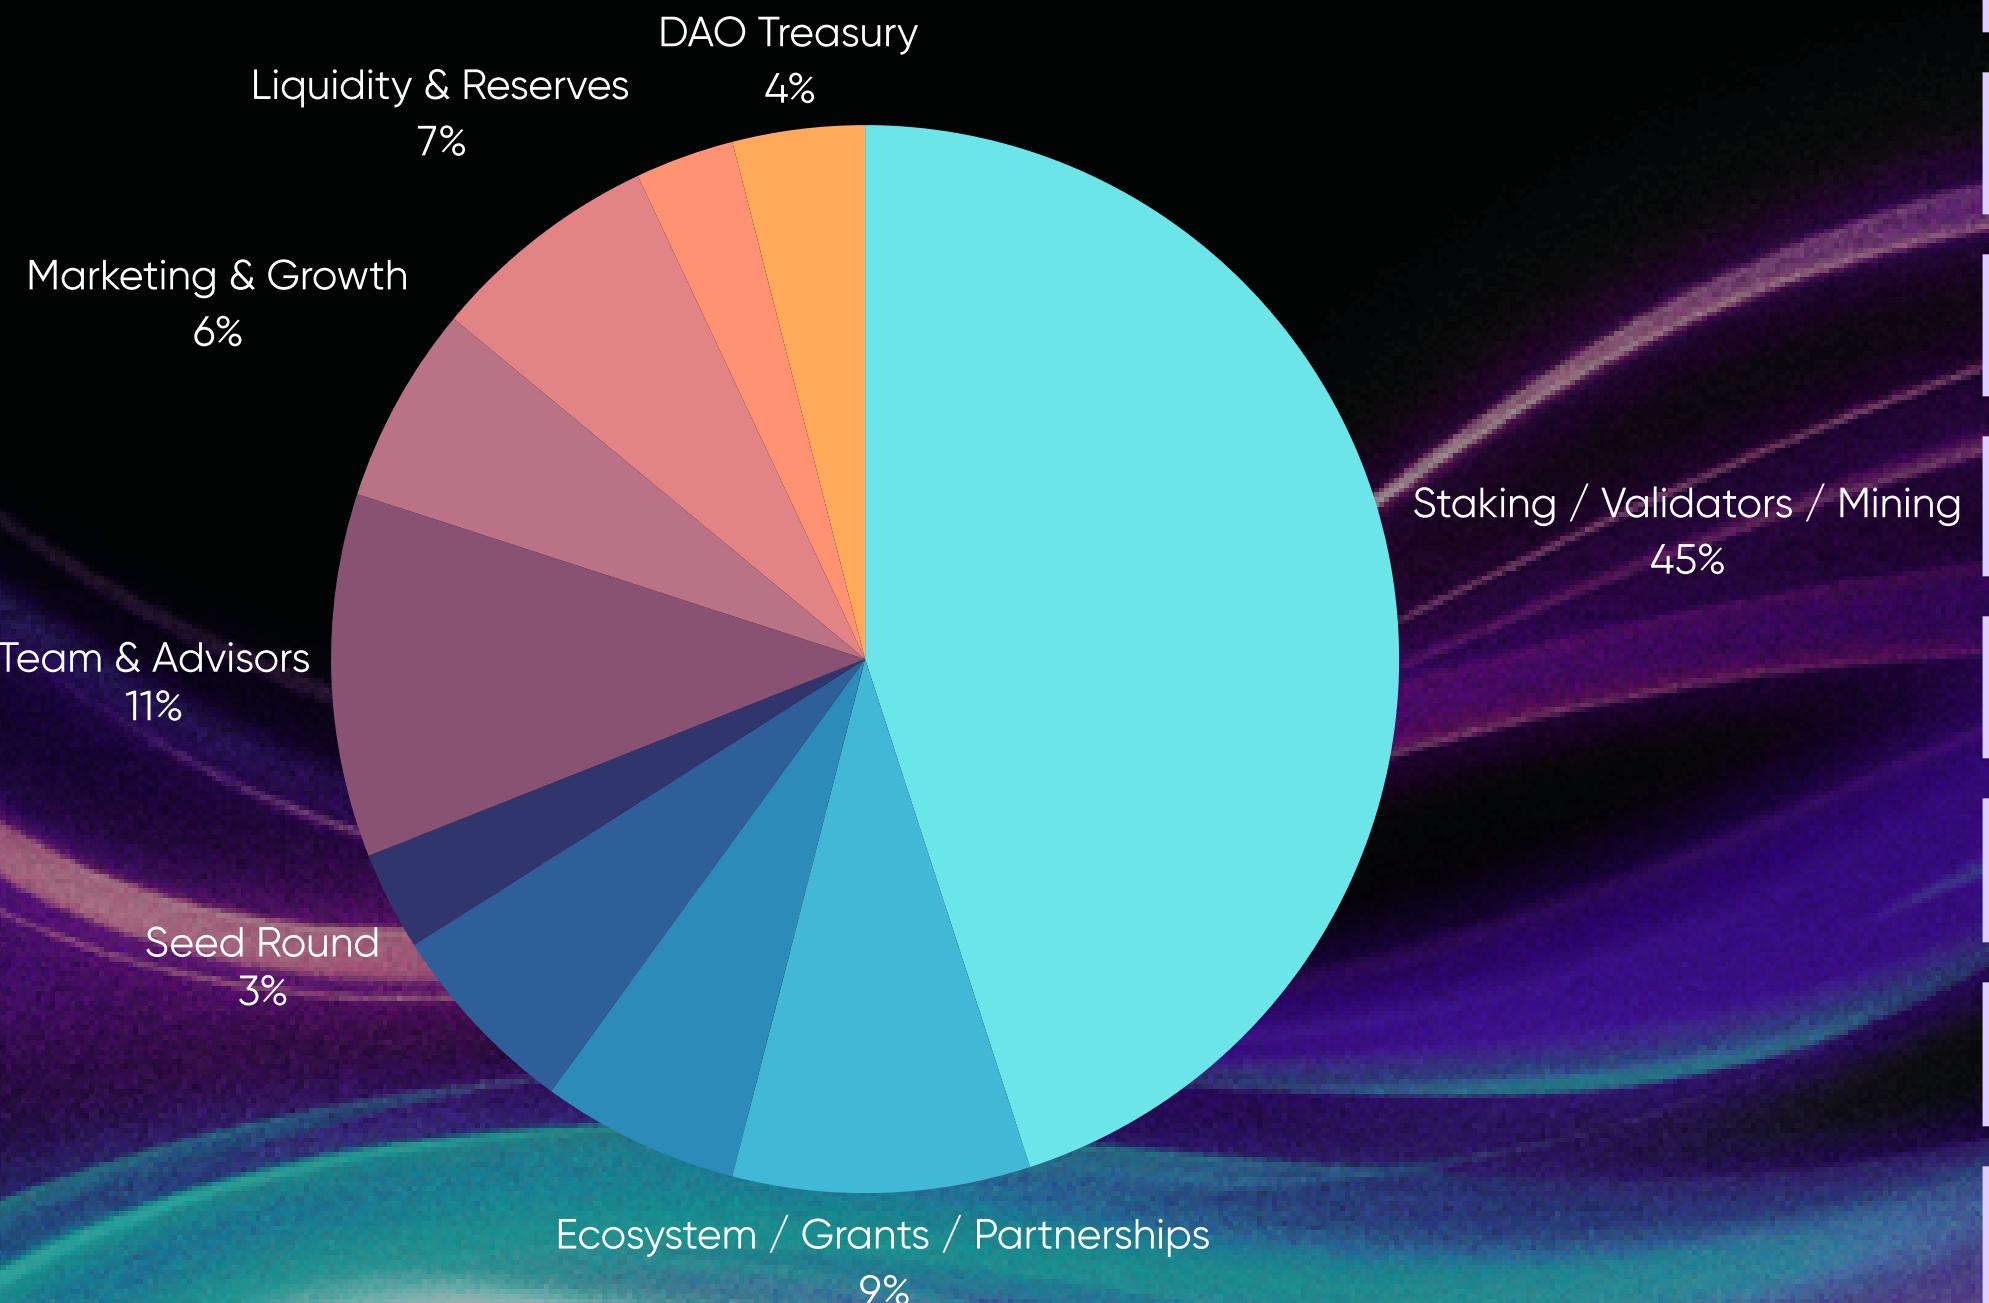

**IoT Data Integration** : Devices pay micro-fees in \$SAVI (e.g., 0.01 \$SAVI per data packet) for trusted data streams.

**Validator Incentives** : Validators earn \$SAVI for maintaining consensus and processing transactions.

**Marketplace Payments** : \$SAVI used for decentralized apps, SaaS subscriptions, and ecosystem services.

**Deflationary Mechanism** : from 0.1% to 1% burn on each transaction, increasing scarcity and value over time.

# TOKEN ALLOCATION \$SAVI

Staking/Mining/Validators	\$SAVI 900,000,000
Ecosystem/Grants	\$SAVI 180,000,000
Pre sale (Community + Retail)	\$SAVI 120,000,000
Private Sale (VC + Strategic)	\$SAVI 120,000,000
Team/Advisor	\$SAVI 220,000,000
Seed Round	\$SAVI 60,000,000
Marketing & Growth	\$SAVI 120,000,000

4–6y	8%	160
...	...	...
45–50y	2%	40

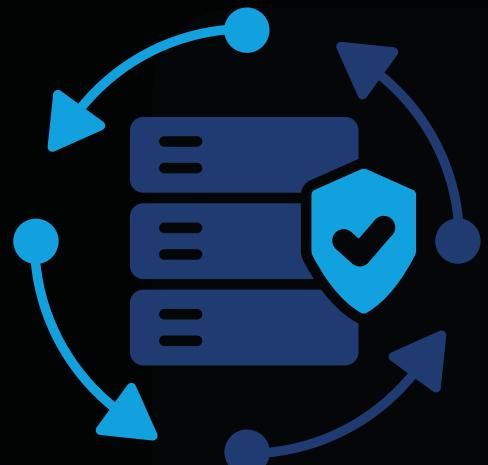

# SALE ROUND \$SAVI

Round	Nominal Price (\$)	Tokens Allocated	Bonus %	Funds Raised (\$)	ROI @ \$0,025
<b>Seed Round</b>	\$0,008	60.000.000	0,00%	\$480.000,00	3..13x
<b>Private/Strategic</b>	\$0,012	120.000.000	20,00%	\$1.440.000,00	2.08x
<b>Presale</b>	\$0,018	120.000.000	16,00%	\$2.160.000,00	1.39x
<b>Public Sale</b>	\$0,025	200.000.000,00	0	\$5.000.000,00	1.0x
<b>Total Raised</b>				\$9.080.000,00	

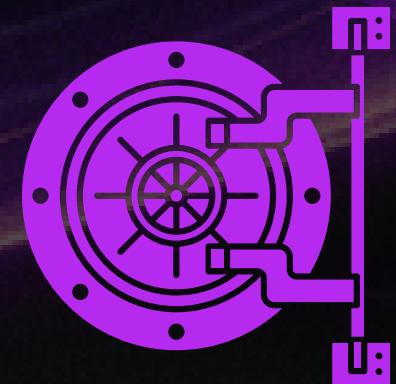

# DEFLATION & BURN MECHANISM

- 0.1-1% TX BURN
- ADAPTIVE BURN LINKED TO VOLUME
- MICRO-BURN ON AI/IOT FEES
- 10% SUPPLY TARGET BURN IN 10Y

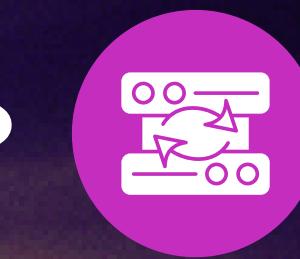

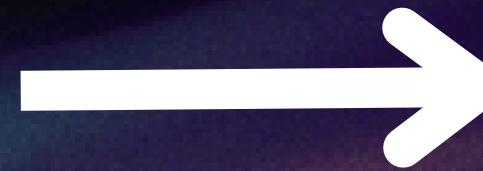

# GOVERNANCE & TREASURY

- DAO TREASURY (7%)
- MULTI-SIGNATURE WALLETS (3/5)
- TIME-LOCKED SMART CONTRACTS
- PUBLIC WALLET REGISTRY
